

Drysnow technical data

2. Feature of drysnow

- 1) Continuous or intermediate operation is possible without snow clogging
- 2) It can be installed in the automatic line. (type DS-2~4)
- 3) Carry gas temperature can be changed to avoid dew condensation. (Type DS-1, 2)
- 4) Flow rate can be changed
- 5) Clean specification is possible since filter is installed in the line.
- 6) Particle enlargement is not occurring, since drysnow is generated at snow gun
